It's basically a sample player-nice pianos,saxes- and came with a load of samples on floppies, some of which are marked 'Akai S-300 samples' and do check out as such, however, the thing doesn't recognise my Akai samples/ disks, and neither does the Akai recognise WX's disks. There is clearly something my simple mind is missing.

The very earliest Akai S series sampler, the S612, isn't particularly prized as a vintage unit. Despite some fans that still love the S612 to this day, many of those samplers have been plundered for parts or left to electronics recycling bins over the years. But while it was a very simple machine compared to those that followed, its basic functions set the stage for the line of rackmount samplers that would help bring sample-based music-making into the modern age.
