Postman Leo Egan

Leo Joseph Postman (June 7, 1918 – April 22, 2004) was a Russian-born American psychologist known for his research on human memory. He taught at the University of California, Berkeley from 1950 to his retirement in 1987. In 1961, he founded Berkeley's Institute of Human Learning, which later became the Institute for Cognitive and Brain Sciences.

Leo Postman - Wikipedia

Leo Joseph Postman, professor emeritus of psychology and a dominant figure in the study of human memory, died on April 22, 2004, of heart failure at his home in Marblehead, Massachusetts. He was 85. Postman was “a major theoretician in the development of the theory of forgetting,” said friend and colleague Donald Riley, professor emeritus of psychology.

This study tests the assumption that in the A-B, A-C transfer paradigm the unreinforced evocation of covert or overt first-list responses during the acquisition of the second list results in the unlearning of the first-list associations. In an RI design using the A-B, A-C paradigm the work groups received interpolated trials on a second list in which the type of responses either remained the ...

"This paper examines two major sources of extraexperimental interference in long-term forgetting: (a) letter-sequence interference which is produced by well established associations between letters in S's language, and (b) unit-sequence interference which reflects pre-experimental associations among the units of a list. Both types of interfering associations must be extinguished during the ...

Extraexperimental sources of interference in forgetting.

Abstract. An experimental study of short-term memory for lists of familiar English words is reported. Lists of 10, 20, and 30
