William A. Tiller is a professor emeritus of materials science and engineering at Stanford University. He is also the author of Science and Human Transformation, a book about concepts such as subtle energies beyond the four fundamental forces, which he believes act in concert with human consciousness.

William A. Tiller - Wikipedia

A background in physics can inform the study of other disciplines, and is one of the preferred preparations for many activities that are setting new directions in society. The department offers several courses for non-science majors to provide some of this background. The physics department also coordinates the combined degree in engineering.
